About

UI UX Designer & Frontend Developer experienced in React Js, Next Js, React Native and Figma with 4 years of experience.

Skilled in developing pixel perfect, accessible user interfaces using React Js for the web and React Native for cross platform mobile applications. Moreover, skilled in using Figma for designing user interfaces, corporate assets, marketing materials and social media posters for the platforms LinkedIn and Instagram. Over the course of my career, considerable experience in data driven applications such as Vessel Management systems, Volunteering platforms and ERP applications.

One of noticeable work with React Native is Emirates Nature Volunteering platform mobile application, which is live on Apple AppStore (Leaders of Change).

Experience

Maa Gold LLC

Designer & Digital Marketing Coordinator

August 2024 - December 2024

Gold Souk | Deira, United Arab Emirates

Actively participated in client pitches and brainstorming sessions, contributing both creative design concepts and innovative business development ideas.

Designed impactful infographics and marketing materials that effectively communicated business information, leading to a 30% increase in client engagement and understanding.

Created corporate assets, multiple branding assets such as letterhead, identity card, event invitation cards etc. for the firm.

Tower Ideas / Cosmic DNA

Frontend Developer (Remote / Contract)

April 2024 - July 2024

Dubai, United Arab Emirates

Worked with remote developers in the UK on an AI based project, Sentiment Chat.

Developed Frontend for Sentiment Chat, an AI backed chat application, using Next JS and ShadCN.

Worked in a multidisciplinary product team, demonstrating excellent communication skills and time management to successfully deliver projects in time.

Global Invisions

UI UX Designer | Frontend Developer

July 2023 - March 2024

Kochi, Kerala, India

Developed mobile application for IOS and Android using React Native for Leaders of Change by Emirates Nature.

Converted UX wireframes and mockups into responsive, interactive features, using React Js, Tailwind CSS and Ant Design .

Single-handedly developed the frontend for multiple projects including doorstep delivery apps and ERP projects.

Worked with an agile team to develop web apps from ideation to final delivery of the product.

Navalt Electric Boats

Frontend Developer

July 2020 - June 2023

Startup Mission, Kerala, India

Delivered 8+ data intensive projects in the shipping and vessel domain.

Developed complex, data intensive dashboards for vessel tracking and management.

Developed Milaha Analytics Platform, for deck management, weather predictions and visualization which is the most successful project that I've delivered.

Education

Bachelor's in Computer Science

Mahatma Gandhi University, Kerala, India
